SMit!™
Add-on for message master™
Send SMS from MS Outlook!
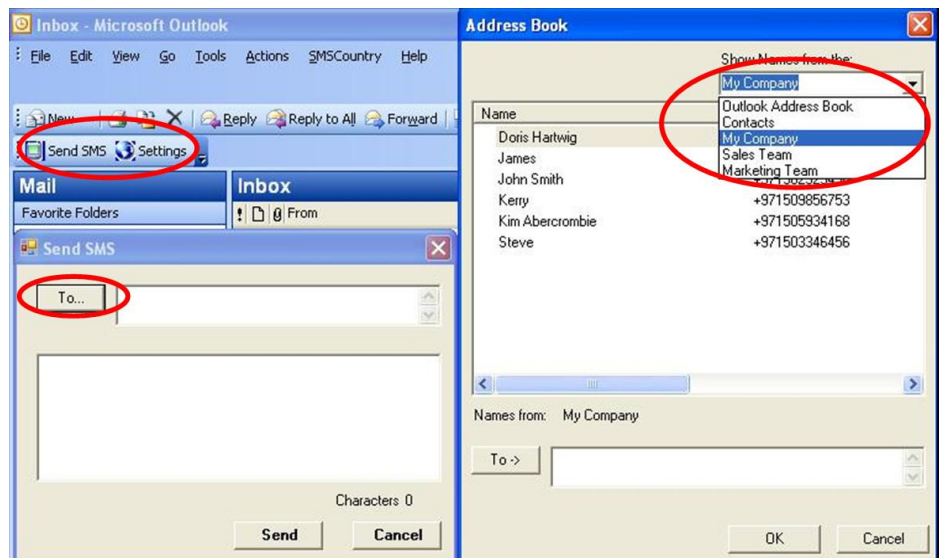

Benefits of SMit!™ Add-on

- Allows easy sending of SMS messages from their Outlook 2003 and 2007 toolbar

- SMS messages can be scheduled as Outlook 2003-2007 Calendar events

- Facilitates keyboard usage for typing SMS messages

- Multi-lingual text typing and messaging

- Message splitting made possible when used with message master™ xsp

- Needs no effort to configure address books, as address books available in MS Outlook (including Microsoft Active Directories) are used.

- SMS messages can be sent to groups defined in Outlook address books.

- Dedicated folder is installed in Outlook to archive SMS

SMit!™ Add-on MS Outlook2003-2007 Address Book Integration Module

SMit! is a Microsoft Outlook 2003 and 2007 plug-in that can be used with each client to send SMS messages and allows for mobile phone numbers to be picked up either from a local Address Book of each individual MS Outlook client or from any LDAP structure, like Microsoft Active Directory.

The user can then send out a free format text message to any of the mobile numbers stored in these Address Book structures. SMS messages can either be sent immediately or scheduled for sending later by creating events in the Outlook 2003-2007 Calendar.

Add-on module for Derdack EA and message master™ xsp

SMit!™ is an add-on module, from Acette Technologies, built for usage on Derdack's messaging engines **message master™ Enterprise Alert** and **message master™ xsp**. Targeted specifically for corporate users, this module facilitates quick typing of SMS notifications using computer keyboards. Ideal for instantly typing and transmitting alerts and messages to GSM phones of individuals (customers or staff), or broadcasting to pre-defined groups, in Outlook 2003 Address Books and Microsoft Active Directories. SMit! can be used by any of the named users in the message master™ range of products.
